HALRAI INDUSTRIES INC.

COMPANY'S PROFILE

Halrai Industries Inc. was founded in 1985 by Mr. Nicola Di Lorenzo who remains its CEO to this day.

Experts in the transformation of sheet aluminium and steel into a variety of service vehicle interiors, Mr. Di Lorenzo and his three sons, Henri, Pierre and Jean-Claude draw on generations of experience to develop and manufacture value-added products of distinction.

Halrai Industries Inc. was founded in 1985 by Mr. Nicola Di Lorenzo who remains its CEO to this day.

Experts in the transformation of sheet aluminium and steel into a variety of service vehicle interiors, Mr. Di Lorenzo and his three sons, Henri, Pierre and Jean-Claude draw on generations of experience to develop and manufacture value-added products of distinction.

The combined advantages of a large manufacturing facility, and the use of aluminium as the conversion material of choice, have given Halrai Industries Inc. a real edge in terms of quality, price and all round added value for its customers.

While Halrai conversions are made to fit a variety of trucks, vans and pick-up trucks, each one is uniquely tailored to accommodate specific tasks or trades, whether it be mechanical, electrical, plumbing, carpentry traffic control, etc.

The gauge specification utilized is dictated by each project. Aluminium provides strength, durability, lightness, affordability, and as an added bonus, a certain aesthetic appeal.

Over and above the standard products and conversions it has to offer, Halrai Industries values most of all its hard-earned good reputation as a custom manufacturer. Most of its production in fact is built to customers specifications.

Close collaboration with our customers has therefore become the cornerstone of our business. Quality workmanship and customer satisfaction is the result and long lasting customer relationships is its legacy.

ADVANTAGES

With the second millennium upon us, we are expected to quality products right from the start and every single time after that. This has always been the standard at Halrai Industries Inc. and that is why we have been able to attract progressive and like-minded customers.

Halrai Industries Inc.'s primary role is to ensure:

...that original parts on vehicles provided, conform to national safety and security standards as well as state-of-the-art technology.

...that in each conversion, there be optimal utilization of available space.

...that the ergonomics are always designed to facilitate working conditions for the service personnel utilizing it.

...that task-related national standards be applied in each installation.

...that each conversion/installation be tailored to the specific service task at hand.

...that each conversion kit be built and installed with durability in mind in order to ensure long-term efficiency, security and functionality.

...that, barring undue abuse or neglect, each conversion kit and each installation be guaranteed for parts and service for a minimum period of twelve months.

...that Halrai Industries Inc. always gives it the team effort it is recognized for to ensure maximum synergy and success.
